Microneedling post care is essential for your skin to heal properly!
Here are a few things you can be doing while your skin is in the healing process 🌟

- Ice your face and keep your skin cool
- Wash your hands before touching your skin
- Sleep on a clean pillowcase
- Drown your skin in gentle, hydrating products
- Keep your body temperature down - no sweating, working out, saunas, steam rooms, hot tubs, etc for at least 24 hours
- Stay out of the sun + apply your sunscreen daily
- Drink lots of water!!
- Use red light therapy
- Don't pick at any peeling / flaking skin. Bonus points if you apply an enzyme mask 4-5 days post treatment to encourage safe, and gentle exfoliation ☑☑

[@simranchoudhary_](#) rejuvenating and hydrating her skin with our original hydrafacial treatment!

Hydrafacial treatment starts with three simple steps—from there, we'll personalize the experience based on your skin goals.

✨ Cleanse : Deeply cleanses and exfoliates with a gentle peel to uncover a new layer of skin.

✨ Extract : Removes impurities from pores with painless gentle suction.

✨ Hydrate : Saturates the skin's surface with intense moisturizers and nourishing, personalized ingredients.
