Scan your website for bad URLs online or Download a Free Chrome, Microsoft Edge Extension

[Advanced Settings](#)

Atomseo is a software company and part of Virtoway Group — an international IT company developing high quality and innovative products in various areas ranging from ecommerce to project management and collaboration. [Atomseo](#) focuses on website productivity tools.

According to statistics, every second site contains at least one dead link (server response code "http status 404"). The issue affects both small beginners' sites as well as well-known web portals (even Fortune 500). Surveys show, that only 23% of users who came to 404 error page, make a second attempt to find the requested page, and the remaining 77% will leave the site forever!

Our headline product is Broken Link Checker —a free web-based online tool for checking your site's health. It scans web site, pages, or domains of any kind. As a result, you can get the complete list of broken or dead links (404 errors) including anchors, images, CSS links and java. Also, it provides status codes (2xx, 3xx, 4xx, 5xx, 6xx) of every single link, including redirects information (301 and others). Moreover, you can get the list of Meta Title, Description, and H1 including duplicated content warnings.
